

Seminar 1
week 1 (1 October - 4 October 2024)

Please join the TEAMS- code m179gc4

A. Please read the seminar rules in SeminarRules.pdf.

B. Discussion of OO basic concepts in Java:

1. OO basic concepts: the class inheritance, overriding, casting.
2. Class inheritance vs. interfaces.
3. How to use packages to organize the code.
4. The implementation of the Model, Repository, Controller and View.
5. How to treat the errors using exceptions.

C. Write a program to solve the following problem: *In a box there are apples, cakes, and books. Please display all entities which have weight greater than 200 grams. To represent the box please use an array. Use Model-Repository-Controller-View to design the application architecture.*
